Experience

Lead Backend Developer, Adherial Inc.

March 2012 to April 2015

Responsible for design, implementation, and maintenance of the Adherial Insurance and Wellness Platform. Tasks included but were not limited to development of all server resources, databases, web services, web front ends, and server infrastructure.

Application and Web Developer Intern, A-dec Inc.

June 2011 to December 2011

Designed and implemented a RESTful web service that served up LDAP security data to be consumed by other applications. Designed and implemented a web application for tracking and managing local server storage.

Web Developer Intern, The Boeing Company

March 2010 to September 2010

Led a small team in the requirements gathering, design, and implementation of a custom security platform deployed on all internal Boeing applications. Upgraded all on-site .NET applications to the latest framework.
